

The Theory of Creation

THE CREATION BOOK THAT ANSWERS THE QUESTIONS:

- How long were the Creation days?
- Can we prove God's existence through the "Intelligent Design" of nature?
- Was man a special creation of God?
- Did man descend from the Hominids?
- Did evil exist before man's fall?
- What was the source of the light on the First Day?
- Are dinosaurs mentioned in the Creation Story?
- Do the words "evening", "morning", and "day" in the Creation Story indicate that Creation days were 24 hours?
- Were the sun, the moon, and the stars created on the First Day or the Fourth Day?

THE BIBLE AND SCIENCE

For over a century, the Holy Bible's story of creation has come under considerable scrutiny and derision by the scientific community. The

length of creation days, the Biblical order of creation, and man's origin have all been the subjects of heated debates – debates that cast further doubts on Biblical accuracy.

But is such derision warranted?

The Theory of Creation boldly answers that very question. Rather than denounce other theories or repudiate accepted scientific beliefs, this is a comprehensive and objective analysis of the first story of the Bible (Genesis 1:1-2:4). Each verse is carefully examined for its scientific meaning, the original Hebrew text is often referenced, popular theories are explored, and the purpose and implications of God's actions are addressed. Finally, the Biblical account of creation is compared to the scientific record.

The Theory of Creation will take you on a wondrous journey through time and space – from the explosive birth of our universe in the Big Bang, through the violent chaotic formation of planet Earth, to the creation of all life here – culminating in the creation of man. You will be presented with the Biblical Creation story from the perspective of science with an emphasis on God's plans for humanity and the purpose in His Creation. The Theory of Creation answers many of the enduring questions of science and resolves the Biblical Creation debate.

PERSPECTIVES ON SCIENCE AND CHRISTIAN FAITH REVIEW

“...much intellectually and spiritually appetizing food for thought...”
“As a general believer in intelligent design, I appreciate many of the discussions in this book.”

Reviewer: Dan Simon, Assistant Professor of Electrical Engineering, Cleveland State University, Ohio

CHAPTERS

I. Introduction (sample chapter)

1. The Origin of Genesis
2. In the Beginning, God Created
3. Formation of the Earth
4. Unformed and Void
5. Darkness Envelops the Earth
6. A Watery World
7. God Hovers Over the Waters
8. Light!
9. The Evening and the Morning
10. What is a Day?
11. The First Act of God
12. God Called the Expanse "Sky"
13. Land Emerges From the Sea
14. Vegetation – The First Life
15. The Lights in the Sky Above
16. Life Flourishes in the Sea and Air
17. The Convergence of Events with the Passage of Time
18. The Land Animals of the Sixth Day
19. The Creation of Man
20. In Our Image, In Our Likeness
21. Man's Dominion
22. The Green Plants for Food
23. A Day to Rest
24. Fulfillment of God's Commands and His Verdicts
25. According to Their Kinds
26. More Biblical Evidence for Long Creation Days
27. Science Supports Scripture
28. Natural Processes and Acts of God
29. Other Creationist Challenges
30. The Predictions of Creation
31. The Theory of Creation
32. The Meaning of Creation
